

# LAKSHAN KUMAR J

Senior Full Stack Engineer | Node.js & React | Microservices & AI/LLM

## PROFILE

Full-stack engineer with 5+ years building scalable, cloud-native applications with **Node.js**, **React**, and **microservices** across FinTech, EdTech, and OTT streaming. At Neokred, led a 9-engineer team delivering TypeScript/Fastify microservices and REST APIs for a high-concurrency platform; at BYJU'S, engineered secure auth and user-management on a system serving 50M+ accounts. Recently built **localrag**, an agentic AI application using LLMs, LangGraph, and tool-calling. Strong in API design, event-driven architecture, CI/CD, and taking components end-to-end from design to production.

## PROFESSIONAL EXPERIENCE

**Neokred Technologies**

Dec 2022 – Apr 2026

Software Development Engineer III (SDE-3) & Team Lead · Bengaluru, KA · FinTech

- Designed, developed, and maintained full-stack applications with **React**, **Next.js 14**, **Node.js**, and **Fastify**, sustaining thousands of concurrent users at sub-200ms response times.
- Built and enhanced scalable **microservices and RESTful APIs** with layered Redis caching and API-gateway patterns, following modern engineering standards.
- Developed cloud-native, **event-driven service flows** and containerized them with Docker & Kubernetes for high availability and horizontal scaling.
- Owned components end-to-end from architecture and design to production support, with unit/integration testing and CI/CD driving zero-downtime releases.
- Led and grew an engineering team from 4 to 9, delivering 3 enterprise applications on schedule with zero critical production incidents; led architecture & code reviews and mentored engineers.

**BYJU'S**

Oct 2020 – Nov 2022

Software Engineer → Associate SE → Engineering Trainee · Bengaluru, KA · EdTech

User Management System — 3 promotions in 2 years

- Built high-impact features for a user-management system handling **50M+ accounts** across India.
- Designed and implemented secure, well-documented APIs with authentication and authorization via JWT, OAuth 2.0, and role-based access control.
- Optimized user-data retrieval and search on PostgreSQL through efficient indexing, reducing query response times.
- Delivered admin dashboards and user-analytics modules in React.js & Redux for real-time monitoring.

## PROJECTS & FREELANCE

**localrag — Agentic RAG Assistant (Open Source)**

github.com/lakshan-jk

Python · FastAPI · LangChain · LangGraph · FAISS · Embeddings · LLM APIs

- Built an **LLM-powered** RAG pipeline (ingest → embed → vector search → grounded, cited answers) exposed via a FastAPI service.
- Implemented an **agentic** mode with LangGraph — an AI agent that invokes knowledge-base search via **tool calls** and iterates before answering — the same tool/agent pattern used in MCP-style integrations.

**Gravitorix — YourBackers (OTT & Social Platform)**

Freelance · Tuticorin, TN

Sole engineer — end-to-end architecture, AWS infra, backend, and 4 client platforms (web, iOS/Android, TV)

- Architected and shipped a multi-service OTT streaming platform (ABR HLS, Multi-DRM, CloudFront CDN over private S3) end-to-end across web, mobile, and TV, plus a companion social platform with in-app WebRTC calling and payments (PayU, Razorpay).
- Engineered cross-platform clients in React Native (with a Flutter rewrite) and a React web portal.

## CONTACT

+91 86107 26520  
kumarlakshan1032@gmail.com

Bengaluru, Karnataka, India

## EDUCATION

**B.Tech, Computer Science Engineering**  
Kalasalingam University  
2016 – 2020

## TECHNICAL PROFICIENCIES

**Languages**

TypeScript, JavaScript (ES6+), Python, SQL

**Frontend**

React.js, Next.js 14, Redux, React Native, TailwindCSS

**Backend**

Node.js, Fastify, Express.js, REST APIs, GraphQL, WebSockets

**AI / LLM**

LLM-powered apps, Agentic frameworks (LangGraph), RAG, tool/agent integrations, prompt workflows, MCP-style tooling, vector DBs (FAISS)

**Architecture**

Microservices, Distributed & Event-Driven Systems, Cloud-Native, API Design, System Design, DDD

**Databases**

PostgreSQL, MongoDB, Redis

**Cloud & DevOps**

AWS, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD

**Practices**

Agile/Scrum, TDD, Code Review, Git, Data Structures & Algorithms

## KEY STRENGTHS

**Ownership:** Delivers medium-to-large features end-to-end, design to production.  
**Leadership:** Grew and mentored a 9-engineer team; drives issues to closure.
